A great balance of productivity features

High-volume scans for non-stop productivity

Today, waiting is rarely an option. Turning a hard copy into an electronic document is usually something you need to achieve in minutes – sometimes even seconds. These MFPs give you ultra-fast A4 scanning at 120 originals per minute or 240 (opm) when scanning double sided.

For maximum efficiency, double-sided documents are scanned in one pass. For schools or legal offices, such scanning capability is invaluable, and ensures maximum productivity when you need it most.

An innovative ultrasonic double-feed sensor detects when more than one sheet enters the feeder. By alerting you, the sensor enables you to rectify the feed straight away. You'll find this feature invaluable when scanning documents that have a high page count.

Intuitive control with InfoPalette touch panel

 An intuitive 10" touch screen features 'flick and drag' and 'pinch and zoom' operation similar to that of popular mobile tablet devices. The familiar fingertip controls, horizontal scrolling and pop-up menus enable simpler navigation. It's all there on a single intuitive screen, and most people will be able to use it with minimal instruction. This interface is also highly customisable to your requirements.

Automatic backups for peace of mind

The risk of losing your precious corporate data can be minimised, with this optional feature. You can specify these bizhub MFPs with a virtually failure-proof data protection system, based on two separate hard drives. The data on one hard drive is 'mirrored' on a second drive – so your data is retained automatically in the event of a failure. It's worth considering, to put your mind at rest.

Optional advanced finisher with built-in Z-folding unit

When you want to create and present documents with the highest levels of finish, these new bizhub models deliver every time. With this option, you can take advantage of an advanced finisher with integrated Z-folding capabilities.

The finisher enables you to bind your documents with 'saddle-stitching', for a truly professional result. There's a minimum of waiting, because you can bind a document virtually at the same time as it is copied or printed.

The bizhub 958 and 758 achieve all this in a footprint that's surprisingly small. So they take up a minimum of valuable office space.

Wireless mobile and cloud connectivity

Today's workplace is rapidly evolving, with mobile technology providing employees with greater flexibility. In many cases, staff can now work from home or other locations outside the office. This can deliver many business benefits, including improved overall efficiency and employee time management.

With these state-of-the-art MFPs, your staff or customers can use their mobile phones and tablets for effortless printing – anytime, anywhere. People can take advantage of full wireless connectivity, using popular mobile platforms such as iOS and Android. This approach also ensures high levels of security, thanks to robust user authentication procedures.
